What is multi display?

Enables to display multiple monitors compatible with Windows Vista, XP and 2000 with only 1 PC without requiring an additional video card establishment. With this, a multi display can be performed easily.

Work solution enabled in multi display

In multi display environment, a work efficiency can be improved dramatically by using 2 displays with only 1 unit. Moreover, a smooth presentation can be performed by using a clone desktop feature.

Online trading case example

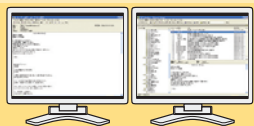

A couple of monitors are required for online trading as various information shall be displayed at a time.

Presentation case example

A smooth and smart presentation such as onsite presentation via laptop is enabled by using clone desktop feature.

Office case example

You can save time at offices for performing "display switch" or "memorization" with multi display.

For "More" simplified multi display

As being USB peripherals...

- Open/Close or establishment work is not required
- Consideration on video card compatibility issue is unneeded
- Multi display environment is enabled with laptops
- Establishment up to 4 monitors available

Being only USB peripherals...

- Enables multi display with Windows Vista, XP and 2000
- Supports "Multi Desktop" that extends display area
- Supports "Clone Desktop" that enables simultaneous display

Enables additional establishment "up to 4 units"

By combining with different color models in order of your choice, establishment up to 4 monitors are enabled. A simultaneous use of "Multi Desktop" and "Clone Desktop" is also available.

*Note that concurrent use of the same color model is unavailable with 1 PC.

Specification

Model No.	USB20SVGA
Product	Sign as VGA Marine Blue PLUS
Compatible PC	PC with USB2.0
Compatible OS	Windows Vista / XP / 2000(SP4)
Connector Type	PC side: USB2.0 Monitor side: D-sub15Pin (Analog RGB)
Display Color	16.77 million colors (MAX)
Horizontal Freq.	60~85Hz
Dimension	Unit: 50(W)×25(H)×115(D)mm Cable Length: 440mm
Weight	120g
Current	500mA (MAX)
Supply Voltage	5.0V (supplied from USB connector)
Temperature	0~40 degrees C
Humidity	20~80% (Without condensation)
Warranty Period	1 year from purchased date
Certification	FCC, VCCI, CE, RoHS, WHQL

Compatible Resolution

4:3 Monitor (analog connection)	
Display Resolution	Display Color
800×600 pixel	16 / 32 bit
1024×768 pixel	16 / 32 bit
1152×864 pixel	16 / 32 bit
1280×960 pixel	16 / 32 bit
1280×1024 pixel	16 / 32 bit
1600×1200 pixel	16 bit

Wide Monitor (analog connection)	
Display Resolution	Display Color
1280×768 pixel	16 / 32 bit
1280×800 pixel	16 / 32 bit
