1. Introduction

The Technote Series of digital note recorder has built-in memory that allows you to instantly capture notes or diagrams written in ink on normal paper without connecting into your computer, and then transfer a digital data into a computer for viewing, editing, or sharing by email on Windows platform. When the Technote connects into a computer, it is able to use like a tablet.

1.1 Possible applications

Technote can be deployed in any situations where both a paper hardcopy and a digitized soft copy are required, such as minutes taking, lecture notes taking or business presentation. The artist and writer are able to do their jobs any time when good idea coming out.

1.2 System Requirements

Operating System	Windows 2000/XP/Vista
CPU	Pentium III 500 MHz or Higher Level of PC
RAM (Memory)	128 MB or Higher
Equipment	One USB port, one CD/DVD ROM Drive
Hard Disk space for Driver installation	Minimum space 32 MB

1.3 Package Content

《TN-A501》

1. Technote: digital note recorder x 1
2. A5 size of notepad x 1
3. Digital ink pen (Black) x 1, digital pen (Red) x 1 (Become digital pen after connecting to computer)
4. 1.4V button cell battery x 2 (for digital pen)
5. Leather slipcover x 1
6. Three refills (Three are Black) for digital pen
7. USB connecting cable x 1 (100 cm)
8. 1.5V AAA size x 4 (for digital note recorder)
9. CD x 1(**Includes Digital Organizer, My Script Notes For U 30 days Trial version + Electrical manual**)
10. Quick Start Guide
11. Mini Screwdriver

《TN-A442/401》

1. Technote digital note recorder x 1
2. A4 size of notepad x 1
3. Digital ink pen (Black) x 1, digital pen (Red) x 1 (Become digital pen after connecting to computer)
4. 1.4V button cell battery x 2 (for digital pen)
5. Leather slipcover x 1
6. Three refills (Two are Black, One is Red) for digital pen
7. USB connecting cable x 1 (150 cm)
8. 1.5V AAA size x 4 (for digital note recorder)
9. CD x 1(**Includes Digital Organizer, My Script Notes For U 30 days Trial version + Electrical manual**)
10. Quick Start Guide
11. Mini Screwdriver

2. Knowledge about Technote

Model : TN-A501

USB Port

Batteries and Pen refill
Trough

Pen Trough

Handwriting Area :

Able to write and record anything in the area of digital recorder.
The maximum area is 150 x 210mm (5.9"x 8.3").

Handwriting Thickness :

The maximum thickness of notepads for the digital recorder is 15mm.

**Model :
TN-A442/A401**

USB Port

Pen Refills Trough

Batteries Trough

Handwriting Area :

To write and record anything in the area of the digital recorder.
The maximum area is 210 x 263mm (8.3"x 10.3").

Handwriting Thickness :

The maximum thickness of notepads for the digital recorder is 5 ~ 7 mm.

2.1 Install the batteries into the digital recorder

Open the batteries of trough and change the batteries. After that, close the cover trough.

TN-A501

TN-A442/A401

Turn of the power before changing the batteries or the memory data could come out with errors.

WARNING! When the battery installed in a wrong way, will leak out the liquid from the battery.

Do not mix together with different brands or used batteries.

Please take out the batteries if not using for more than 30 days.

Four AAA alkaline batteries can be used approximate 100 hours continuously. Battery life varies based on different brand.

2.2 Install the batteries for Digital Pen

Open the bottom of digital pen's lid and take out the mercury battery from packing bag, then install a new one with the negative (-) pole facing the pen tip. Screw both barrel parts up until tight.

 Incorrect battery installation will result in the malfunction of the digital ink pen.
Important :
Remove cover label before inserting the pen battery.

 In case to lose the digital pen, please put them into the Technote's trough.

 Recommendation of Mercury battery :

Brand	GP	IEC/JIS	EVEREADY	VARTA	DURACELL
Model	GPZA13	PR48	AC13E	V13	DA13X

Pen's refill:
1. MiniStar D1

MiniStar®

Brass tube
Nickel plated brass tip
Stainless steel ball Ø: 0.8 mm

Available colours: Black, Blue, Red
According to ISO 12757-1 or 12757-2 DOC (Documentary proof)

2.Other brands : the standard of dimension : 67.16(L) x Ø 2.35mm) (Nickel plated brass tip).

2.3 Setup the NotePad and recorder

Attach the paper notepad on Technote pad standard and the maximum size is:

TN-A501 150mm x 210mm (A5)

 Please do not exceed the size of Digital recorder and exert great efforts to tear the papers.

Available working area :

TN-A501 : 210 x 150 mm

TN-A442/A401 : 210 x 263 mm

2.4 Store Device

The built-in 32MB FLASH memory is able to save the handwritten notepads as digital one (*.DNT).

 Please do not save the files from computer into digital Technote's memory, or the data in Technote will be damaged or lost.

3. Technote Operation Guide

3.1 Front panel's functions

	Status one		Status two (MENU setup)	
		POWER	Power on/off	MENU Select MENU
		NEW	Start/Create a new Page	ENTER Confirm
		UP	Previous Page	UP Select
		DOWN	Next Page	DOWN Select
		DELETE	Delete current page	ESC Return to the main menu

The LCD display

 For recognizing the text on the LCD screen easily, the two decimal digits of the page counter are enlarged in the center of the screen, whereas the hundreds (0-1) are displayed behind the hyphen in the top row of the display.

 Although the Technote theoretically has the ability to build up about 99 workbooks of 199 digital pages each, such ability is limited to the maximum storage capacity of the built-in flash memory in practically. Therefore, the TN-A501 has a storage capacity of 32MB, which is about 150 digital pages, and about 75 pages for TN-A442/A401.

3.2 Power Button

1. Enable the Digital note recorder

In order to start the Digital note recorder, press the button of **POWER** about 3 seconds, the LCD shows on (as right picture).

2. MENU Functions

Press the button of , and select the menu functions. (Please refer the section 3.6 -- Menu functions)

3. Disable the Digital note Recorder

In order to shut down the Digital note recorder, press the button of **POWER** about 3 seconds, the LCD shows off (as right picture).

3.3 Build up and store a new page

 It is **strongly recommended** to number down the sheets on your notepad and copy the workbook and page number on the LCD display each time when you turn over a sheet. This will help to synchronize the paper sheets with the workbooks and digital pages in the Technote's memory.

STEP-1 Press  to create a new page.

To avoid the creation of superimposed digital pages, make sure that the page status indicator on the LCD screen displays an empty page before you start writing on a new page.

Before creating new page or selecting the old one, waiting for  or  comes out for recording data.

The size of the files is depending on how much the handwritten data you have.

3.4 Modify notes

Whenever, you can turn the page you wish to go that you have written and saved before.

Press the **Page Up**  button or **Page Down**  button to browse pages and make corrections or additional notes on empty space.

You may browse several sheets at a time to check earlier notes. However, if you want to make additions on a particular sheet, you must turn the page by repeatedly pressing the *Page Up* or *Down* buttons until the page counter indicates the same number as the one you have marked on the sheet itself.

3.5 Delete pages

Method 1 Pressing the **Delete** button that equals tearing off or crossing out a paper sheet of the notepad.

Press  **YES** **Confirm**

Press  **NO** **Cancel**

Method 2 Use the software function to delete pages on Windows:

After connecting your Technote into a computer, then open the pages folder by using [Digital Organizer](#) (Install method, see the CH 4.1). Checking the Technote data and selecting the pages you wish to delete. In addition, you can remember and delete pages faster by put a mark “-” in the head of file name.

3.6 MENU functions

STEP-1  Turn on the power by pressing  and get in the functions of menu.

  (Enter)  (Esc Return to main menu)  (Return to note taking model)

3.7 Testing for Digital Ink Pen

Firstly, pick up the digital pen(make sure the mercury battery install properly) and try to write anything on the Technote's working area

(LCD will display ), that means the pen is working fine. (if detect the pen around the working area but no writing action, then LCD will display ).

-  If the LCD displays the icon  or , the digital pen is working fine.
-  If no icon displays, that means the pen has no action. (Even though you still write by using a normal pen, no record or action will be saved as computer files.)
-  Be careful if no icon  appeared when you are in writing action. If not, please check the battery run out or not install properly.

4. Introduction to Software Functions

The Digital Organizer allows you to view, edit, annotate, or e-mail on Windows. You can download the digital notepads from the Technote to your computer, and organize, rename, delete, or save them in most frequently used file formats like JPG, BMP, SVG, or PDF.

4.1 Install Digital Organizer

1. Turn on your computer and start Windows
2. Insert the Digital Organizer CD into the CD-ROM driver. If your system has the "Auto run" function enabled, your screen will display the setup screen menu. If the setup screen did not appear for a while, double click *My computer* on the Windows desktop, and then click the *Compact Disc* icon and the *Setup* icon in succession.

3. Confirm the location of the destination folder (recommended) and click [OK].

4. To proceed with the installation, click [OK], wait until the installation is completed, and click [OK] again.

4.2 Transfer your data from Technote to your computer

1. Using USB cable to connect your Technote and computer. Make sure your computer is power on and plug the mini connector into your Technote and plug the big connector into an available USB port on your computer.

2. The LCD display will show a USB connector diagram to confirm that you have successfully established a USB connection between the Technote and your PC, and that the Technote is in *pen tablet mode* (see section 4.4).

Technote in Pen Tablet Model

Do not use the 32MB flash memory of the Technote as a storage disk, or memory errors may occur!

When using Digital Organizer, please close the other software to avoid the software conflict.

When the Technote connecting with computer, it won't use battery power but will receive its power from the computer.

4.3 Importing digital pages

1. After you plug in the USB connector to your PC, "Note Notifier" screen will come automatically. Press [OK] to confirm.

2. Use the dialog window to select [Copy File(s)] or [Moving File(s)].

3. After confirming the action, it displays the transferring status.

4. When the files transfer finished, you can find a new folder named "Note Files" in My Document folder.

4.4 Using the Technote as Tablet

As soon as you have established a USB connection between your PC and Technote, you can have the function of tablet. You can use the digital ink pen as an input device that working as the same way as the pen tablet, mouse or a tablet PC.

You must turn the Technote as the same direction as  USB connector showing on LCD display.

According to different usage and personal habit, TN-A501 / TN-A442/A401 could be turn into 4 directions.

Avoid direct contact between the pen tip and the writing area surface. Cover the writing area with a sheet of paper, or just use an empty page of your notepad when using the Technote in pen tablet mode. This will avoid scratches or ink traces on the Technote's surface.

Technote's Directions for writing (TN-A501)

Normal (Page rotating 0°)

Page rotating 90°

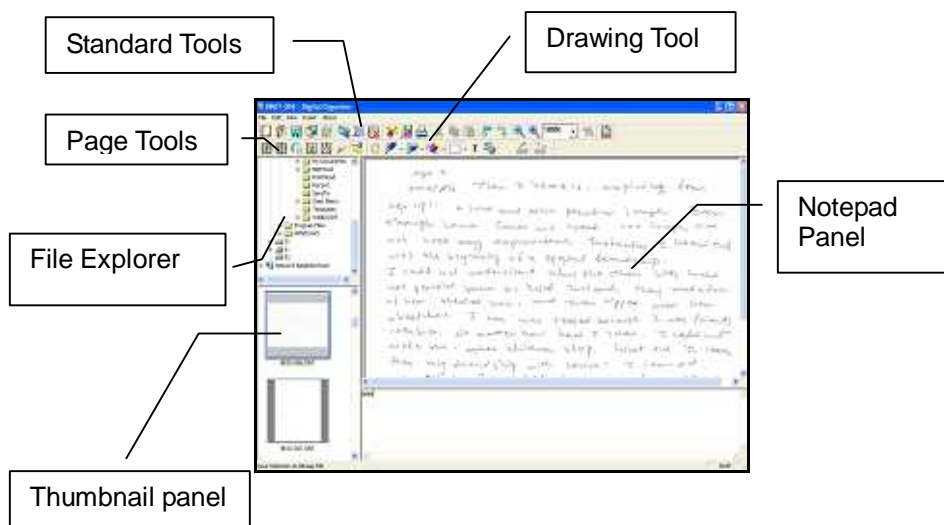

Page rotating 180°

Page rotating 270°

4.5 Introduction to Digital Organizer

To start the program in Windows 2000 (or XP), double click on the Technote icon  on the Windows desktop. Alternatively, click [Start] ► [Programs] ► [Technote] ► [Technote icon ]. The Digital Organizer's main window will appear on your screen:

4.6 The standard Toolbars

New

Create a new Technote digital page.

Open

Open an existing Technote file. Use the dialog to locate the file in the Technote flash memory, or on your hard disk.

Save

Save the currently selected digital page. The page will be saved as PDF, JPG, BMP, SVG, Notes or DNT.

Save as

Save the currently selected digital page in another file name or file format.

(e.g. .dnt, .jpg, .bmp, .pdf, .svg, .not es, etc.)

Save Selected Area

Two file models supplied with JPG or BMP.

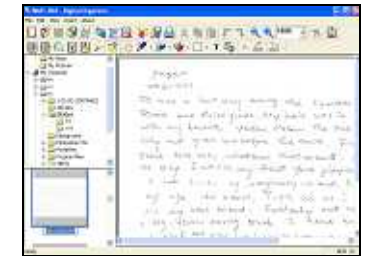

New folder

In Technote Explorer, click on a new folder and key in an appropriate folder name, and press [Enter].

Rename

Click on the **Rename** icon and key in the new name in the thumbnail's caption.

Delete -- Click on the **Delete** icon to delete the selected digital page(s). Click [OK] to confirm, or [Cancel] to abort this action.

E-MAIL :

You can attach one, many or all pages and send email with JPG or PDF file model.

Please follow the steps as show below:

1. After clicking on the *E-Mail* icon your selection will appear in the *Attach file(s)* dialog box.

2. Hold down the *Shift*-key and move the cursor to the right to select consecutive pages.

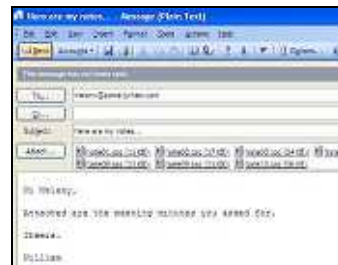

3. Hold down the *Ctrl*-key and click on individual file names to select non-consecutive pages.

4. Click the [Add File...] button to add in the files. Click on the [Move up] or [Move down] buttons to change the order of the pages. In the drop down menu, select whether you want to attach the pages as JPG files or a PDF file.

6.2 Take Care of your Technote

To assure proper functioning of the Technote, please observe the following precautions:

- Remove the batteries from the Technote if it is not expected to be used for long periods. This will eliminate the possibility of battery liquid leaking from the batteries and corroding internal components.
- Remove the button-cell battery from the digital ink pen if it is not expected to be used for long periods.
- Avoid placing magnetic media or hot or heavy items on the surface of the Technote.
- Clean the pen and the housing of with a soft cloth lightly dampened with water or a neutral detergent.
- Never drop the digital pen or the note recorder. The Technote may malfunction if subjected to strong shocks or vibration.
- Avoid cutting or scratching the surface of the Technote.
- Never immerse the pen or digital not recorder in liquid.
- Avoid operating or storing the pen and the recorder in extremely hot or cold temperatures, or where the relative humidity is high.
- Never take the Technote or pen apart as this will void warranty. Leave service of the device to qualified technicians
- Do not use or store the Technote in the vicinity of equipment that generates strong electromagnetic radiation or magnetic fields.
- When not in use, please put back on the pen point cap to save energy mode. Otherwise, avoid to frequency influenced.

7. Q & A, Troubleshooting

? A superimposed digital page is created.

Make sure to press the *New* button on the front panel every time when you turn a paper sheet on the notepad to start a new digital page, and make sure that the *Page* icon on the LCD monitor shows an empty page .

Note: You can repair superimposed pages with the *Untangle* function (see section 4.7).

? The problems of Technote or Digital Ink Pen

- The batteries in the Technote may have run out of power during a note taking session. Please replace the batteries (see section 2.1 for instructions).
- The battery in the digital pen may have run out of power during a note taking session. Please check if the pen icon on the LCD display is either white  or black  (see also section 3.2) in note taking mode to ensure the digital pen is working.
- Please check if the battery cover is properly closed in note taking mode.
- You may have put the notepads thicker than the maximum thickness. This will be caused the digital pen tip to move outside of the reading height range of the Technote. Please check if the pen icon on the LCD display is either white  or black  (see also section 3.7) in note taking mode to ensure a proper reading height distance.
- After you have switched on the device, it may take a few seconds for the page icon -  or  - to appear on the LCD display. Please wait for the Technote to properly start up.
- You may set the auto-suspend timer too short. (See section 3.6.3.). Please increase the auto-suspend time.
- Do not use two pens at the same time, or place one pen on the notepad while writing with another one.
- Technote has not connected to PC yet.

? Technote cannot power on

- The batteries in the Technote may have run out of power during a note taking session. Please replace the batteries (see section 2.1 for instructions).
- Technote is connecting into computer, which means the Technote changed to the Tablet function.

? The Page counter has not yet reached 199, but the memory is full.

Although the Technote theoretically has the ability to manage up to 99 workbooks of 199 digital pages each, such ability is limited to the maximum storage capacity of the built-in flash memory. In practically, the Technote has a storage capacity of 32MB, but TN-A501 only store about 150 digital pages, and TN-A442/A401 can save about 75 pages. Therefore, you can store pages into computer, and then format Technote and clear memory or writing more new pages.

8. Technote Specifications

TN-A501:

Technology	Electromagnetic digitizer
Dimensions	281(L) x 180(W) x 15(H) mm
Weight	358g (not including batteries)
Paper size	150 x 210mm DIN A5 Size
Thickness notepad	Max. 15 mm
Storage medium	Built-in with 32MB flash memory
Power Source	Alkaline batteries AAA 1.5V x 4
Battery Life	About 100 hours (continuous use)
Work Current	3V / 20mA \pm 5mA
Power Consumption	60mW \pm 15mW
Power saving	Auto suspend after 15 min (default). idle time (configurable)
Interface	USB 1.1

Digital ink pen specifications

Dimensions and Weight	145.7(L) x 16.6 \varnothing mm, 14g including battery
Power source	One 1.4V button cell battery (PR48)
Battery Life	About 500 hours (continuous use)
Ink cartridge	67.16(L) x 2.3 \varnothing mm

File formats

Proprietary	DNT ; dnt
Mainstream	pdf ; bmp ; jpg ; svg ; notes

TN-A401:

Technology	Electromagnetic digitizer
Dimensions	332(L) x 249(W) x 16(H) mm
Weight	545g (not including batteries)
Paper size	A4 size – 210 x 297mm Letter size – 215.9 x 279.4 mm Working Area : 210 x 263mm
Thickness notepad	Max. 5~7 mm
Storage medium	Built-in with 32MB flash memory
Power Source	Alkaline batteries AAA 1.5V x 4
Battery Life	About 100 hours (continuous use)
Work Current	3V / 20mA \pm 5mA
Power Consumption	60mW \pm 15mW
Power saving	Auto suspend after 15 min (default). idle time (configurable)
Interface	USB 1.1

Digital ink pen specifications
